#### **CHEWS 4 HEALTH INGREDIENTS / Chews4Health Supplement**

Chews 4 Health contains some of the most powerful antioxidant-rich nutrients found in the world!

Fruits and berries offer tremendous health enhancing qualities and contain hundreds of naturally occurring vitamins, minerals, antioxidants, amino acids, enzymes, essential fatty acids, fiber & phytonutrients. The 4 “Super Fruits” contained in Chews-4-Health are considered by many experts to be the most nutrient rich fruits the world has to offer. Our carefully selected super-fruit complex gives you the power of all 4 in one supplement.

Some of the [antioxidant-rich ingredients found in Chews 4 Health](#) include:

**ACAI** - From Good Morning America, "Acai contains a concentration of antioxidants, to help combat premature aging, with 10-30 times the anthocyanins (antioxidants) of red wine. Acai has an almost-perfect essential amino acid complex in conjunction with valuable trace minerals vital to proper muscle contraction and regeneration." NONI - One of the most important components of the noni fruit is proxeronine, a natural ingredient, which is a building block essential to human cell growth. Human cells require xeronine to function properly.

**B12** - Vitamin B12, also known as cobalamin, is necessary for the body's normal synthesis of red blood cells, important for the maintenance of a healthy nervous system and vital for the proper growth and development of children.

**FOLIC ACID** - Folic Acid is needed for the body's energy production and is necessary for the body's normal creation of red blood cells.\* It also helps synthesize DNA, which carries the body's genetic information, helps with normal tissue growth and cell function.\* In addition, Folic Acid also helps support the formation of digestive acids. It is commonly referred to as the "brain supplement" and has been shown to help with maintaining a healthy mental and emotionally balanced state.

**GOJI BERRIES** - These healthy berries also contain powerful polysaccharides which have anti-aging properties as well as improved learning, memory abilities and remarkable immune system enhancing capabilities. This could explain why the Goji Berries may contribute to living a longer and healthier life. Goji berries have 18 amino acids (including 8 essential amino acids.) Essential amino acids are ones that the body cannot produce and must come from the food we eat. Goji berries also contain trace minerals and protein. There is more beta carotene in Goji berries than in carrots and they contain MORE VITAMIN C THAN ORANGES! They are also a rich source of naturally occurring B1, B2, B6, vitamin E, essential fatty acids and polysaccharides.

**RESVERATROL** - Resveratrol is the key ingredient in red wine that made headlines in November (2006) when scientists demonstrated that it kept overfed mice from gaining weight, turned them into the equivalent of Olympic marathoners, and seemed to slow down their aging process.

**SEA VEGETABLES** - Our Sea Vegetable blend contains up to 70 naturally occurring plant source minerals from A to Z. Sea vegetables are virtually fat-free, low in calories and offer soluble, plant based trace elements. They also contain chlorophyll and are a good source of protein.

**SELECT FRUIT CONCENTRATES** - Chews-4-Health contains 4 select fruit concentrates (Pomegranate, Blueberry, Cranberry and Raspberry.) These carefully selected fruits were chosen as part of the formulation because of their combined health enhancing properties.

Chews 4 Health ALSO contains:

- NO Salt
- NO Pasteurization
